

Dear participants,

I request you to install the following software on your computer and make it ready. I assume that everyone is using windows O/S based computer.

Step 1: Download TeXLive

<http://mirror.iopb.res.in/tex-archive/systems/texlive/Images/>

texlive.iso (~ 4GB)

Step 2: Download WinCDEmu

<https://wincdemu.sysprogs.org/>

Step 3: Install WinCDEmu

Step 4: Open WinCDEmu

Step 5: Mount texlive.iso using WinCDEmu

Step 6: Open the texlive.iso mounted drive

Step 7: Double click install-tl-advanced (basch file) and wait for few seconds for a GUI to pop-up

Step 8: In the smaller pop-up window click continue

Step 9: In the Install-tl window just click on Install Tex Live (an another pop-up window will open)

Step 10: Installation of packages will be started in the new pop-up window

Step 11: It may take 30 min for all the packages to get installed

Step 12: After complete installtion, you can see the statement "press any key to continue". Just press any key

Step:13 Download TEXMAKER editor

<https://www.xmlmath.net/texmaker/>

Step 14: Install (default location)

Step 15: Go to <https://github.com/karthishanmugamsastra/latexwebinar>

Step 16: Download latex-webinar.tex

Step 17: Create a folder in desktop and name it as webinar

Step 18: Copy the download latex-webinar.tex to webinar folder

Step 19: Open TEXMAKER - file open - latex.webinar.tex

Step 20: In TEXMAKER click  **PDFLaTeX**

Step 21: Go to the folder webinar and if you find a newly created folder with the name latex-webinar.pdf - open it ... Excellent.. You have done with the installation of Latex !
